JUSTIFICATION FOR REAL WORLD TESTING APPROACH

Under the ONC Health IT Certification Program (**Certification Program**), health IT developers are required to conduct Real World Testing of their certified health IT (45 CFR 170.405). As health IT developers, in Real World Testing, we identified topics and specific elements of Real World Testing that ONC considered a priority. As developers, we considered the overall complexity of the workflows and used cases within the care settings in which we marketed our certified health IT.
